Cover Image: The 100-year old New Croton Dam stretches across the valley and its spillway, while half man-made, utilizes the natural rocks on its north side creating a spectacular waterfall. It has a popular park at its base. It is located on Route 129, about two miles northeast of the Village of Croton. See article on the dam's rich history on page 38.

Photo by Emily Fannon, Village of New Croton-on-Hudson.

Correction: The photo caption on page 52 in the Clearwaters Winter 2006 edition incorrectly identifies the water flowing past the Deposit Sewage Treatment Plant as the Susquehanna River; it is the Oquaga Creek.
