

February 10, 2011

The Honorable John Boehner
Speaker of the House of Representatives
United States House of Representatives
H-232 U.S. Capitol Building
Washington, DC 20515

Subject: Water Quality and the Farm Bill

Dear Speaker Boehner:

As a diverse cross-section of conservation, municipal water, state, agriculture and forest organizations, we have long recognized the relationship between the quality of our nation's waters and agriculture practices and policies. America's clean water and agriculture practices are inextricably linked. In fact, over the next five years agricultural practices and policies will have the single greatest impact on our lakes, rivers and estuaries.

During the 112th Congress, the Farm Bill will provide an opportunity to substantially improve our nation's waters through the promotion of practices that improve the conservation performance of our farms and ranches. To this end, we look forward to working with you to craft a Farm Bill that better connects agricultural systems and practices to water quality improvements.

Whether you're a fisherman, a farmer or a family in a small town or major city, clean and safe water is central to your life. America's rich endowment of water resources has been a cornerstone of our nation's economic success. We must develop a Farm Bill that improves both our nation's water resources and the health of our agricultural working lands.

Again, we appreciate your early attention to this important matter and look forward to working with you on the upcoming Farm Bill. If you are interested in discussing ways in which agricultural policy can better support clean water goals, please contact Doug Siglin, Federal Affairs Director at the Chesapeake Bay Foundation, at 202-544-2232 or dsiglin@cbf.org; or Pat Sinicropi, Director of Legislative Affairs at the National Association of Clean Water Agencies, at 202-533-1823 or psinicropi@nacwa.org.
