

Introducing **Future Leaders** to **Opportunities in Water**

The Western New York Water Environment Association (WNYWEA) Young Professionals Chapter & our 2025 InFLOW Scholars are excited to announce a **tour of the Bird Island WWTF**. You are invited to join us on Monday, March 17, 2025 from 3:00pm-5:00pm. Please note this is the day *before* WNYWEA's 43rd Annual **Greater Buffalo Environmental Conference** in Buffalo, NY, on Tuesday, March 18, 2025.

InFLOW invites students and job seekers from historically underrepresented demographics to explore careers dedicated to protecting the environment and public health in the water sector. With two specialized tracks—**STEMPath** for college students in STEM and environmental programs and **CareerTech** for job readiness program participants—InFLOW offers tailored opportunities to inspire a diverse and inclusive workforce committed to safeguarding New York's water resources.
